The three that move the needle

Ordered by severity, prevalence, and business impact. Clearing these three removes the most risk with the least engineering time.

01 CRITICAL SECURITY & TRUST

QUICK EFFORT · HIGH IMPACT

A form submits over insecure HTTP

Names, emails, and messages can be intercepted or altered before they reach the business.

```
1 form actions use http://.
```

FIX

Point the form action at an HTTPS endpoint and redirect all HTTP traffic to HTTPS.

/CONTACT

02 CRITICAL SEARCH VISIBILITY

QUICK EFFORT · HIGH IMPACT

The page has no title tag

Search results and browser tabs have nothing to identify the page, which suppresses clicks even when it ranks.

```
No <title> element was found.
```

FIX

Add a unique 30–60 character title that leads with the service and the location.

/CONTACT

03 HIGH ACCESSIBILITY

QUICK EFFORT · HIGH IMPACT

6 images lack alt text

Screen-reader users miss the content of these images, and search engines miss the context.

```
6 of 8 images have no alt attribute.
```

FIX

Describe informative images in alt text; use alt="" for purely decorative images.

ALL AUDITED PAGES

Every finding, grouped by area

The complete record behind the score: 36 findings across 5 areas. Each row cites what was observed so nothing depends on trust.

SEARCH VISIBILITY

55/100 · 11 FINDINGS

CRITICAL	**The page has no title tag** No <title> element was found.	/CONTACT
HIGH	**2 internal links point to missing pages** /patient-forms → 404 · /team/dr-lee → 404	3 PAGES
HIGH	**There is no meta description** No meta description was found.	2 PAGES
HIGH	**The page has no H1 heading** No <h1> element was found.	/ABOUT
HIGH	**This page is hidden from search engines** The robots meta tag is “noindex,nofollow”.	/ABOUT
MEDIUM	**The page has multiple H1 headings** 2 H1 elements were found.	/
MEDIUM	**The title is likely to be truncated in search results** The title is 91 characters: “Home | Northwind Family Dental | Family, Cosmetic and Emergency Dentist in Portland, Oregon”.	/
LOW	**Multiple pages share the same meta description** 2 pages reuse the same meta description.	2 PAGES
LOW	**There is no canonical URL** No canonical link was found.	ALL AUDITED PAGES
LOW	**Social share previews are incomplete** Missing og:title and og:image.	ALL AUDITED PAGES
LOW	**No structured data for search engines** No application/ld+json block was found.	/

ACCESSIBILITY

74/100 · 6 FINDINGS

LOW	**MIME sniffing is not disabled** The X-Content-Type-Options header is missing.	ALL AUDITED PAGES
LOW	**Browser features are not restricted** The Permissions-Policy header is missing.	ALL AUDITED PAGES
LOW	**The referrer policy is undefined** The Referrer-Policy header is missing.	ALL AUDITED PAGES
LOW	**The server reveals its software version** The Server header exposes “Apache/2.4.29 (Unix)”.	/

CONVERSION READINESS

89/100 · 3 FINDINGS

HIGH	**The page has almost no substantive content** 82 words of primary content were found.	3 PAGES
LOW	**There is no visible social proof** No testimonials, reviews, ratings, or case studies were found.	SITE-WIDE
LOW	**The copyright still says 2023** The newest copyright year found is 2023; the current year is 2026.	SITE-WIDE

The next ninety days

A sequence, not a wish list. Stop active leaks first, rebuild the foundation second, then compound the gains.

NOW — DAYS 0–30

Stop the leaks

- A form submits over insecure HTTP — Point the form action at an HTTPS endpoint and redirect all HTTP traffic to HTTPS.
- The page has no title tag — Add a unique 30–60 character title that leads with the service and the location.

NEXT — DAYS 30–60

Rebuild the foundation

- 6 images lack alt text — Describe informative images in alt text; use alt="" for purely decorative images.
- The mobile viewport is not configured — Add <meta name="viewport" content="width=device-width, initial-scale=1">.
- The server took 3.2s to respond — Add page caching or a CDN, and profile slow plugins or database queries.
- Plus 10 more fixes from the full findings list.

LATER — DAYS 60–90

Compound the gains

- There is no Content Security Policy — Start with a report-only policy, then enforce a strict allowlist for scripts, styles, and frames.
- The site can be framed by another origin — Send X-Frame-Options: DENY or add frame-ancestors 'none' to the CSP.
- HSTS is not enabled — Send Strict-Transport-Security with a long max-age after confirming every subdomain supports HTTPS.
- Plus 18 more fixes from the full findings list.
